

The Odometer

A Weekly Team Driven Update

Week Six: February 12, 2011 – February 18, 2011

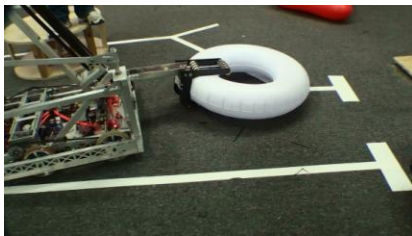

Pete and Christian working on the robot!

Only three more days left!! The crazy hectic season is about to be over. However, all work will not stop after bag and tag. We will still be working hard on the minibot.

Also, this week was a major breakthrough for the programming team! The programming team was able to program the autonomous code and make the robot successfully

Lacey working on Bridgeport!

Robot manipulating the white circle tube!

hang a tube in autonomous. Good job programming team! Also the build team has been vigorously working on the final robot, getting ready for the bag and tag on Tuesday.

The animation, chairman, woodie flowers, and website teams submitted this week and all of them looked fantastic.

Also the PR team has been

Luke and Stetson testing the minibot!

Dakota working on the electronics!

working hard. They have been spending most of the working on updating files for different publication in our pit. They are planning on making individualized clipboards for each team at each of our regional competitions.

Overall, good week. Keep up the work Team Driven.

Minibot placing tube on the high peg!

Upcoming

Team photo will be taken at noon on February 21st. All students meet at R&D to take the picture. Wear pit shirts!

Also, please continue to bring up cans up for the ongoing food drive. We will be going up to Lee's Summit Social Services on Thursday, February 24th right after school. Meet in Mr. Nazworthy's room.
