

# The Odometer

A Weekly Team Driven Update

Week Two: January 14, 2011 – January 20, 2011

This week has been another highly successful week. Team Driven was thankful for the extra days to work this past weekend and certainly put this time to good use. We have had several new developments on our team.

The Website team is getting closer to launching the brand new site. The Build team has started to assemble the robot, and as of tonight has a driving chasis.

The Communications team would like to remind everyone to continue bringing in their canned goods. These cans will go to the Lees Summit Social Services. As an incentive for bringing cans, anyone that brings them will be in the front of the line and get first choice of the food. Please bring a can every time you eat at the shop!

The CAD team has been working hard on the robot design and

integrating sub systems and manufacturing process. Chairman's team is working on the paper and video is in the process of

being brainstormed. The Animation team has been brainstorming together and have come up with some very promising ideas!

The Fundraising team has a lot of new projects lined up. Some of these include a 5k, an R7 Alliance potluck, aTeam Driven Cookbook, and a Drive-in. They are very excited to watch their plans go into action!

Team Driven has successfully made it through week two!
