

The Odometer

A Weekly Team Driven Update

Week Two: January 14, 2011 – January 20, 2011

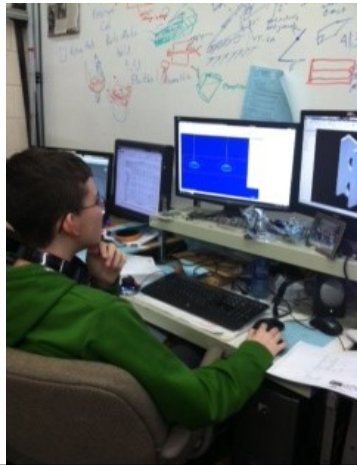

This week has been a busy but fun week. The CAD team has been working on completing several projects. They are very excited about the completion of the super shifters and chassis. They are also pleased with their progress on the designs for the shoot, climbers, and indexers.

The Build team has been manufacturing parts. This weekend the hope to start on welding.

The Communications team is currently working on a new scrapbook for the build season. The communications team cannot wait to carry on with their other projects. They are working hard to achieve their goals and support the team with their various activates.

The Website team has been renovating the website. They are enthusiastic about the changes they've started making.

The programming team has been working hard at updating their software and have been busily teaching the new team members.
