

Week Three: January 20, 2013 – January 26, 2013

The CAD team has been working on completing several projects. They have been working on organizing the CAD process. They hope this will cut down on time between CADing and building. They are thrilled at how quickly they got version one of the robot. The build team has been working on the frame and pyramid for the practice field. They have finish welding the frame. The Machine team has started the practice robot and are excited to get it

finished. They have made delrin, climbing mechanism rollers, hex drive shafts transmission spacers, shaft couplers, and many more parts. The CNC has been running nonstop everyday from when the shop opens after school to when the shop closes. This is happening everyday.

Communications team is currently working on their various projects. They have started updating some of the handouts, pit books, and trifolds. They have scheduled a team picture for Sunday, January 27th. Students need to meet at the shop at 4 pm. They need to wear their pit shirts or their polos.

The Website team has made a few changes to the website. They are working towards their goals for this season.

The programming team has bought an ipad and a mac mini in order to work on devolping a new app for scouting. This week they have been researching ipod app devolpement. They are enthusiastic to get the app up and running.

The Logistics team has been making plans for the Razorback Regional. They are excited with all their progress.
