

THE ODOMETER

LEE'S SUMMIT HIGH SCHOOL

Week 4: On Track

This week has marked the beginning of construction on the actual robot and it is already coming together. The chassis, wheel assembly, and drive train have all been completed and the turret and elevator are being constructed.

Not only is the build team advancing, so is the Web Team. They have done a great job in revamping the old Team Driven site. They've added new pictures and videos from previous years and are talking about adding a blog so parents can get information during the regionals. To take a look at the hard work of the Web Team, visit the Team Driven website, www.teamdriven.us.

This week also marked the beginning of Team Driven's outreach to a new robotics team at ACE Academy in Kansas City, MO. Saturday morning a group of 10 students and several mentors went down to help them work on their robot. Team Driven brought much needed tools, purchased with the money from the Robots Working Together program. By the time Team Driven left, ACE Academy was driving their robot. A big thank you goes out to all those who participated.

Upcoming Events

~ Summit Robotics team representing the three Lee's Summit Robotics teams will be hosting a banquet in March. You will be receiving more details at a later date.

~ The three open houses are taking place this Sunday. The times are:

LSHS -	1:00-2:30
LS West -	2:30-4:00
LS North -	4:00-5:30

If you attend all three and receive a coupon from members of Summit Robotics you will be entered in a drawing for 2 free tickets to the banquet.

~ All of the dates for providing dinner at the build site have been filled. Thank you to everyone who volunteered. Volunteered.

Countdowns

Days until the Robot is shipped: 18

Days until the Kansas City Regional: 27

Days until the Palmetto Regional: 55
